

List of Troforte products and their specifications

☒ Troforte® M All Purpose

- Target Use: General gardening – trees, shrubs, flowering plants, potted and in-ground plants
- Release Duration: 6 months
- Sizes Available: 3.5 kg Tub, 10 kg Tub, 20 kg Bag
- Microbial Content: Up to 24 beneficial microbes (Azotobacter, Rhizobium, Trichoderma, etc.)
- Mineral Content: Up to 60 natural minerals
- Application Tips: Apply around root zone every 6 months and water in thoroughly. Ideal for seasonal planting.
- Key Benefits: Improves soil health, enhances immunity, boosts root growth, increases drought resistance.

☒ Troforte® M Native

- Target Use: Australian native plants, phosphorus-sensitive species (e.g. proteas)
- Release Duration: 6 months
- Sizes Available: 3.5 kg, 10 kg, 20 kg
- Microbial Content: Custom blend supporting native plant microbial ecosystems
- Mineral Content: Low-phosphorus mix suitable for sensitive species
- Application Tips: Spread near the dripline; avoid contact with stems. Water after application.
- Key Benefits: Supports natural flora, enhances flowering, low-risk of burning roots.

☒ Troforte® M Vegetable & Herbs

- Target Use: Edible garden – vegetables, herbs, leafy greens
- Release Duration: 6 months
- Sizes Available: 3.5 kg, 10 kg, 20 kg
- Microbial Content: Nitrogen-fixing and disease-suppressing microbes
- Mineral Content: High potassium, magnesium, calcium
- Application Tips: Apply before sowing and once mid-season. Supplement with Troforte® Liquid every 3 months.
- Key Benefits: Increases yield, enhances flavor and nutritional value, improves plant resistance.

☒ Troforte® M Fruit & Citrus

- Target Use: Fruit-bearing trees – citrus, mango, guava, apples, etc.

- Release Duration: 6 months
- Sizes Available: 3.5 kg, 10 kg, 20 kg
- Microbial Content: Enhances microbial-root nutrient absorption
- Mineral Content: Phosphorus, sulfur, boron, calcium enriched
- Application Tips: Apply before flowering and after harvest. Water in well for best effect.
- Key Benefits: Improves fruit size, sweetness, and consistency. Promotes healthy flowering.

☒ Troforte® M Rejuvenator

- Target Use: Tired or compacted soils, high-traffic gardens, pots, or post-harvest recovery
- Release Duration: 3–4 months
- Sizes Available: 3.5 kg, 10 kg, 20 kg
- Microbial Content: High-diversity microbial blend for recovery
- Mineral Content: Full spectrum including silica, calcium, and trace minerals
- Application Tips: Apply every 3–4 months, particularly after soil disturbance or nutrient depletion.
- Key Benefits: Restores soil health, increases microbial activity, improves water retention and resilience.
